Investment Objective

To generate long-term capital appreciation by investing predominantly in equity and equity related securities of companies with a focus on consumption and consumption related sector or allied sectors theme. There is no assurance that the investment objective of the Scheme will be achieved.

Investment Strategy

- This fund invests in the Consumption theme, strategically positioned to capitalize on key fundamental drivers in India, including rising per capita income, Demographic Dividend, increased urbanization, premiumization, formalization and digitization.
- The Fund invests in stocks that represent the non-cyclical consumer theme – sectors such as FMCG, Consumer durables, Consumer Services (like retail, leisure) etc.
- Companies within this sector generally tend to demonstrate a stable earnings and return on equity (ROE) profile. They tend to exhibit relatively lower risk and volatility in earnings growth compared to other sectors due to factors such as limited government intervention, higher brand loyalty, and reduced exposure to global macroeconomic slowdown.
- This fund aims to invest in companies that are leaders or gaining market share through superior execution, scalability, technology adoption, and other advantageous factors.
- It actively pursues diversification across market capitalizations and various sub-segments within the consumption sector with an aim to effectively manage risks and enhance potential returns.
