Why Returns and Risk both Matter, and not just Returns?

How HDFC Multi-Asset Allocation Fund has navigated volatility across market cycles

In the world of investing, high returns tend to steal all the attention. But if you ask any seasoned investor what truly compounds wealth over decades, the answer is surprisingly simple: a stable investment journey.

Because wealth isn't just built by chasing returns - it's built by navigating volatility smartly, and staying invested through cycles.

That's where the **HDFC Multi-Asset Allocation Fund** stands apart.

Its diversified allocation helps the portfolio adapt across different phases of the market.

Let's understand how HDFC Multi-Asset Allocation Fund with its Structured Approach to Asset Allocation navigates volatility across market cycles.

1

HDFC Multi-Asset Allocation Fund has exhibited Lower Volatility Vs Category Average and Benchmark

The Fund has also exhibited lower standard deviation relative to category average benchmark.

Lower Volatility generally indicates smoother portfolio movements and fewer sharp swings in value. For investors, this may help in having a more stable investment experience, particularly during periods of uncertainty.

Consistent Returns Over Time

Alongside lower volatility, the HDFC Multi-Asset Allocation Fund has also given good rolling returns over time, trying to offer investors a balance between potential growth and relative stability.

CAGR (%)	1 Year	3 Years	5 Years	10 Years	15 Years	20 Years
more than 10	43%	57%	51%	49%	68%	100%
more than 8	57%	76%	90%	97%	100%	100%
more than 5	82%	95%	98%	100%	100%	100%
more than 0	93%	99%	100%	100%	100%	100%
Less than 0	7%	1%	0%	0%	0%	0%

As you can see from the above table, if stay invested in the HDFC Multi-Asset Allocation Fund for 5 years, the chances of returns greater than 8% is 90%.

Structured Approach to Asset Allocation

The HDFC Multi-Asset Allocation Fund is designed to offer investors a diversified portfolio across asset classes. Rather than relying on a single source of return, the fund actively allocates across equities, debt and commodities to navigate different market environments.

The Fund Manager will increase exposure to Equity when market valuations are attractive and will prune down the equity exposure when equity markets get expensive or experience volatility or under any other conditions as found suitable by the Fund Manager.

Takeaway

Balancing return and risk is not optional - it's essential. As markets evolve, a multi asset approach becomes more relevant.

HDFC Multi-Asset Allocation Fund brings this philosophy to life with its disciplined diversification across equity, debt, and commodities.

By choosing strategies that could help protect your downside while capturing potential growth, you set yourself on a stable, confident, and long-term wealth creation journey.
