Navigating Crisis Waves:

How Staggered Lumpsum Investments
via STPs Keep You Afloat

Imagine you are on a beach vacation, wanting to try your hand at surfing. The waves are high, unpredictable, even intimidating. Some people rush in, hoping to catch the “perfect wave”. Others stay away completely, fearing the chaos.

But a seasoned surfer knows better. You step in gradually, adjust to the rhythm, and let the tide work in your favour.

Investing during market volatility is no different.

Investing everything at once may expose you to short-term downside. Waiting indefinitely may mean missing opportunities.

Ride the Market Waves with Staggered Lumpsum Investments via STPs

A Systematic Transfer Plan (STP) allows you to:

Park your lump sum in a relatively lower-risk fund

Gradually transfer a fixed amount into an equity-oriented fund over time

Help spread investments over multiple periods, effectively averaging the cost of investing.

Akash and Prakash, two brothers, received a lump sum of ₹30 lakh each from the sale of a family property. They received the proceeds during a period of heightened market volatility.

Akash preferred investing in equities using a phased approach, while Prakash remained on the sidelines fearing volatility of equity markets and decided to put his amount in a savings account.

Let's see how their decisions played out across two major market disruptions.

Scenario 1

Investing Through the 2008 Global Financial Crisis

Akash

- 01 August 2008: Invested ₹30,00,000 in **HDFC Arbitrage Fund**[^]
- From 01 October 2008: Started a Systematic Transfer Plan (STP) into **HDFC Large Cap Fund**^{^^}
- STP Amount: ₹2,50,000 per month for 12 months

Prakash

- 01 August 2008: Waited on the sidelines and parked his Rs. 30 Lakhs in his savings account.

At the end of his STP cycle, on 30th Sep 2009, Aakash's investment value in HDFC Large Cap Fund was Rs.47.74 Lakhs. with Rs. 1.61 Lakhs remaining in the HDFC Arbitrage Fund, leading to a final corpus of 49.35 Lakhs

Meanwhile Prakash's funds in the savings account amounted to Rs.31.14 Lakhs*

*Interest Rate of 3.5% p.a is considered. Source: SBI

For Complete performance and other details please refer page 6.

Scenario 2

Investing Through the COVID-19 Market Shock

Akash

- 01 January 2020: Invested ₹30,00,000 in **HDFC Arbitrage Fund**[^]
- From 01 March 2020: Started a monthly STP into **HDFC Large Cap Fund**^{^^}
- STP Amount: ₹2,50,000 per month for 12 months

Prakash

- 01 January 2020: Waited on the sidelines and parked his 30 Lakhs in his savings account.

At the end of his STP cycle, on 28th Feb 2021, Aakash's investment value in HDFC Large Cap Fund was Rs.40.81 Lakhs. with Rs. 73,107 corpus remaining in the HDFC Arbitrage Fund, leading to a total corpus of 41.54 Lakhs.

While Prakash accumulated Rs.30.97 Lakhs** in the same time period.

**Interest Rate of 3.0% p.a is considered. Source: SBI

Complete performance and other details please refer page no 7.

In both scenarios, Aakash's STP was already in motion well before markets reached their lowest point during the crisis. As markets eventually bottomed out, this allowed him to benefit from one of the key advantages of an STP which is accumulating a higher number of units at lower market levels causing Aakash to end up with a higher corpus compared to Prakash, highlighting the potential benefits of disciplined deployment of funds during uncertain times.

Takeaway!

Markets are unpredictable but your investment approach doesn't have to be. Using relatively lower-volatility funds as a parking avenue, and gradually transferring into equities through STPs, may help:

- ✓ **Smoothen market entry**
- ✓ **Reduce timing risk**
- ✓ **Improve experience during volatile phases**

As Akash's journey shows, when markets turn volatile, how you invest can matter as much as where you invest.

HDFC Arbitrage Fund

A. SIP Performance - Regular Plan - Growth Option

	Since Inception*	15 year SIP	10 year SIP	5 year SIP	3 year SIP	1 year SIP
Total Amount Invested (₹ in lacs)	22.20	18.00	12.00	6.00	3.60	1.20
Market Value as on March 30, 2026 (₹ in lacs)	40.75	28.75	16.12	7.07	3.98	1.24
Returns (%)	6.18	5.97	5.76	6.52	6.70	6.07
