NOTICE-CUM-ADDENDUM TO THE SCHEME INFORMATION DOCUMENT (SID) / KEY INFORMATION MEMORANDUM (KIM) OF HDFC HYBRID EQUITY FUND AND STATEMENT OF ADDITIONAL INFORMATION OF HDFC MUTUAL FUND

Notice-cum-Addendum is hereby issued that HDFC Asset Management Company Limited (“the AMC”), Investment Manager to HDFC Mutual Fund (“the Fund”) has decided to introduce **covered call strategy** in **HDFC Hybrid Equity Fund (“the Scheme”)** with effect from **August 26, 2026** as it may present opportunities resulting in better risk adjusted returns for the Scheme and additional returns in the form of option premium in a range bound market.

The provisions in the Scheme Information Documents (**SID**), Key Information Memorandum (**KIM**) of the Scheme and Statement of Additional Information (**SAI**) of the Fund (as applicable) shall stand modified as under:

Particulars	Existing Provision	Proposed Provision		
		Type of Instrument	Percentage of Exposure	Circular references
Asset Allocation Pattern* - Indicative Table	-	Covered Call derivatives	As per regulatory limits	Clause 13.15.1 of Master Circular
Where Will the Scheme Invest / Trading in derivatives / Exposure Limits for covered call*	The Scheme shall not write options or purchase instruments with embedded written options.	The Scheme shall not write options or purchase instruments with embedded written options <u>except for the covered call strategy.</u>		
	-	Exposure on account of call option written under the covered call strategy: The Scheme will write call options only under a covered call strategy for constituent stocks of NIFTY 50 and BSE SENSEX subject to the following: a) The total notional value (taking into account strike price as well as premium value) of call options written shall not exceed 15% of the total market value of the underlying equity shares held at all points in time. In case of any passive breach, the Schemes shall have 7 trading days to rebalance the portfolio. During the rebalancing period, no additional call options will be written in the Scheme. b) The total number of shares underlying the call options written shall not exceed 30% of the unencumbered shares of the particular company held in the Scheme at all points in time. The unencumbered shares in a scheme shall mean shares that are not part of Securities		

		Lending and Borrowing Mechanism (SLBM), margin or any other kind of encumbrances. c) In case the Scheme needs to sell securities on which a call option is written under a covered call strategy, it must ensure compliance with (a) and (b) above while selling the securities. d) The Scheme shall not write a call option without holding the underlying equity shares. A call option can be written only on shares which are not hedged using other derivative contracts. e) The call option written shall be marked to market daily and the respective gains or losses factored into the daily NAV of the Scheme until the position is closed or expired.
Benefits and Risks of Covered Call Strategy	-	When the Scheme sells a covered call (also known as writing a covered call), it would mean that the Scheme would already be owning shares of the underlying stock and is selling a call which grants the buyer right, but not the obligation, to buy that stock at a set price until the option expires. The Scheme would earn income known as option price or value premium (commonly known as the option premium). An option's premium is based on several factors, like time value, intrinsic value, and implied volatility etc. Benefits: The key benefit of writing a covered call option is to generate additional income (i.e. the proceeds of the options sale or option premium) on a stock already owned by the Fund. This enhances returns on a security that, in the fund manager's view, is not expected to move in the short-term. It can also be used as an exit strategy for a long position. The downside from fall in the stock price would be lower to the extent of the premium earned from the call option. Risk: Incorrectly pricing the option premium before writing the covered call by ignoring factors which determine pricing like number of days to expiry, adjustment with respect to announced corporate actions like dividend etc. For illustrations on Covered Call strategy, please refer SAI.
