[∞]The Schemes being an Exchange Traded Fund investing in a specific sector carries higher risks versus diversified equity mutual funds on account of concentration and sector specific risks. * Annualised tracking error is calculated based on daily returns for the last 12 months. And for schemes that have completed less than 12 months, Annualised Standard Deviation (tracking error) has been calculated based on the available data, i.e. since inception. Exit load does not apply on ETFs. [^] Margin available / haircut applied depends on broker.
