

What are Ultra Short Term Funds?

- Ultra short term funds are open ended schemes that invest in debt and money market instruments such that Macaulay duration of portfolio is between 3-6 months
- Lower interest rate risk
- YTM likely to be higher than liquid funds
- No lock-in, no entry/exit load
- Currently, portfolio shall be focused on maintaining superior credit quality with focus on accruals

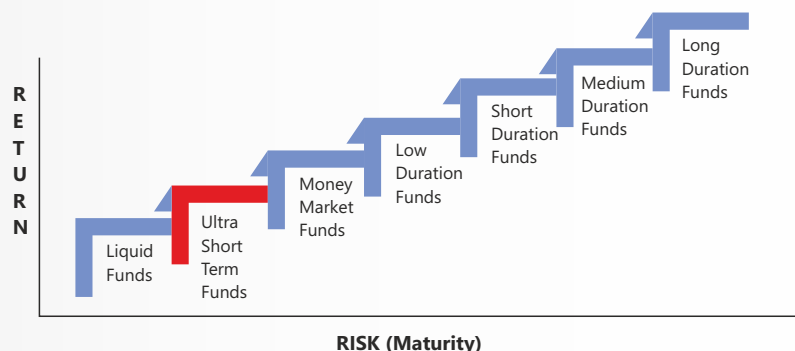

HDFC Ultra Short Term Fund is suitable for investors:

- Desiring a high degree of liquidity and lower interest rate risk
- Having an investment horizon of 2-6 months
- Investors with a need to park surplus cash flows
- Using it as a channel to transfer funds systematically to other schemes

Investment Objective

To generate income/capital appreciation through investment in debt securities and money market instruments. There is no assurance that the investment objective of the Scheme will be achieved.

#Macaulay Duration (Duration) measures the price volatility of fixed income securities. It is often used in the comparison of interest rate risk between securities with different coupons and different maturities. It is defined as the weighted average time to cash flows of a bond where the weights are nothing but the present value of the cash flows themselves. It is expressed in years/days. The duration of a fixed income security is always shorter than its term to maturity, except in the case of zero coupon securities where they are the same.
