

## Factors driving India's consumption in the coming decades

Countries like
China saw a sharp
acceleration in
consumption post
crossing US\$2,000
mark in per
capita income

## **Demographic Dividend**

India has the largest and one of the youngest populations in the world with declining dependency ratio

#### **Premiumization**

Changing income pyramid and higher disposable income leading to premiumization

#### **Formalization**

Shift from unorganized to organized at a faster pace on account of factors like Demonetization, GST, Corporate tax cuts and higher digitization

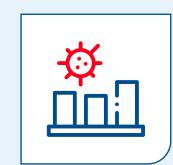

### **Digitization**

Changing consumption landscape - improving access to products and services

### Multiple catalysts to infuse growth

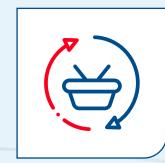

Aggregate consumption in India lagged economic growth post-Covid

Mass consumption to witness potential recovery on the back of:

Income tax relief

- Lower inflation
- Higher welfare spends
- Prospects of above average monsoon

Signs of revival in consumption – both rural and urban

Lower crude & edible oil prices to push margins higher

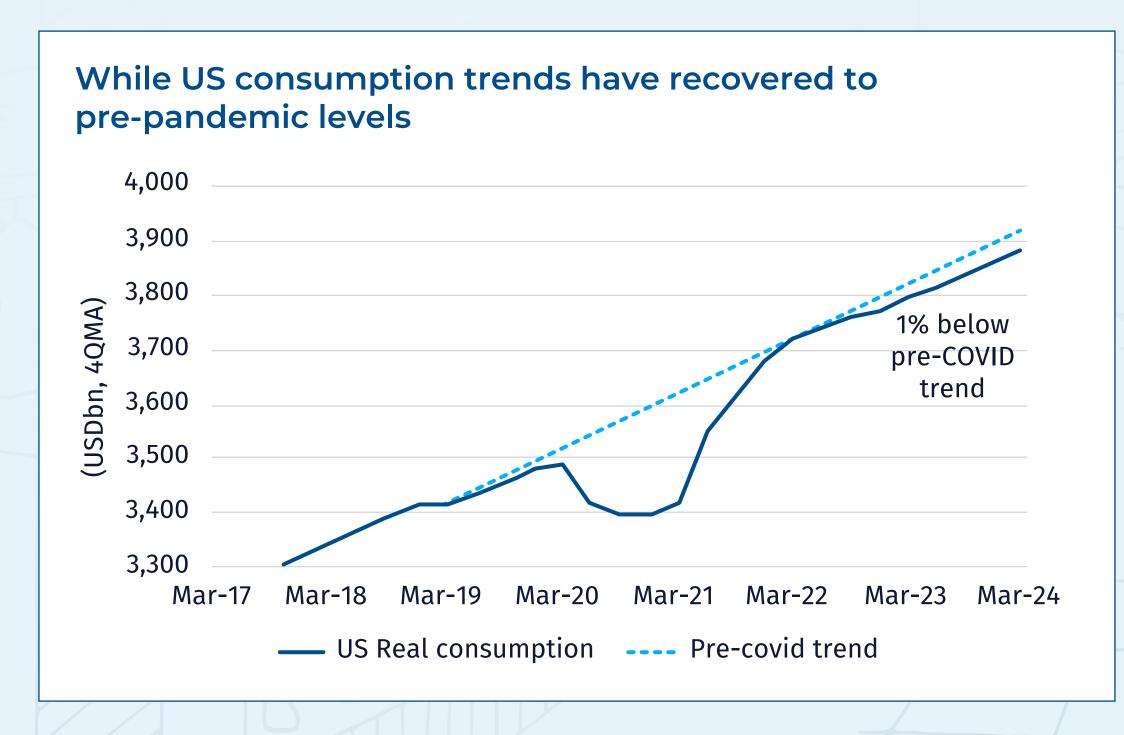

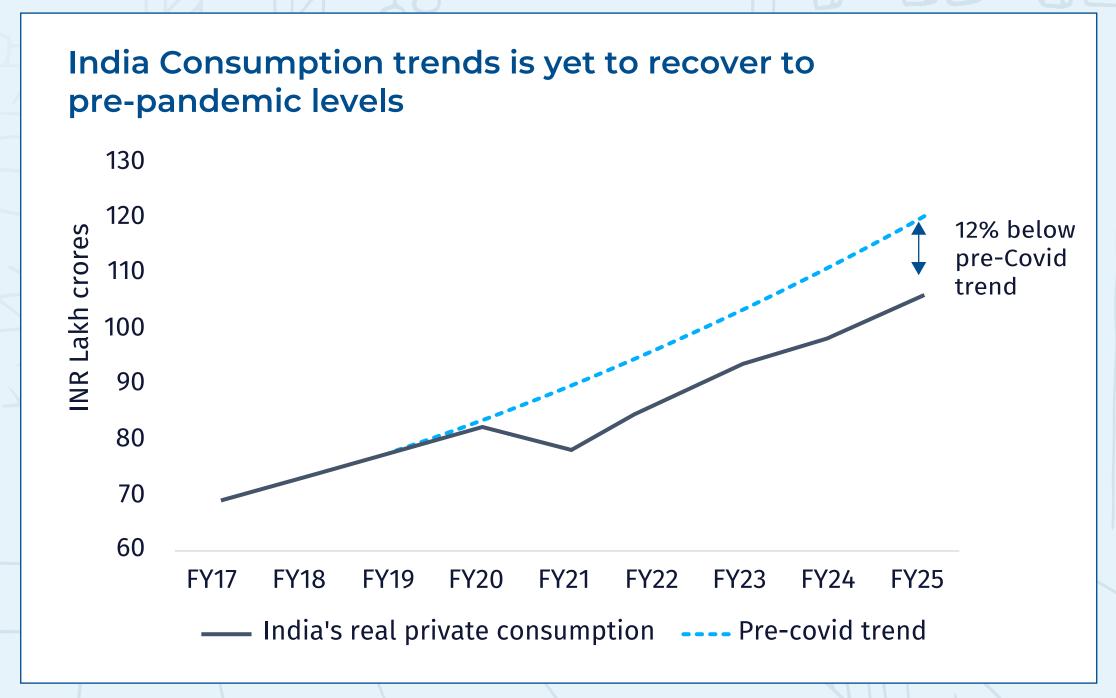

Supportive macroeconomic factors: Lower interest rates, High liquidity, higher services exports

### US vs India -Consumption trends below pre-pandemic levels in india

- US consumption trends recovered to pre-pandemic levels helped by strong 'Stimulus and Relief Package' also known as CARES act which included One-time, direct cash payment of US\$1,200 per person plus US\$500 per child.
- India Consumption trends have not yet recovered to pre-pandemic levels.

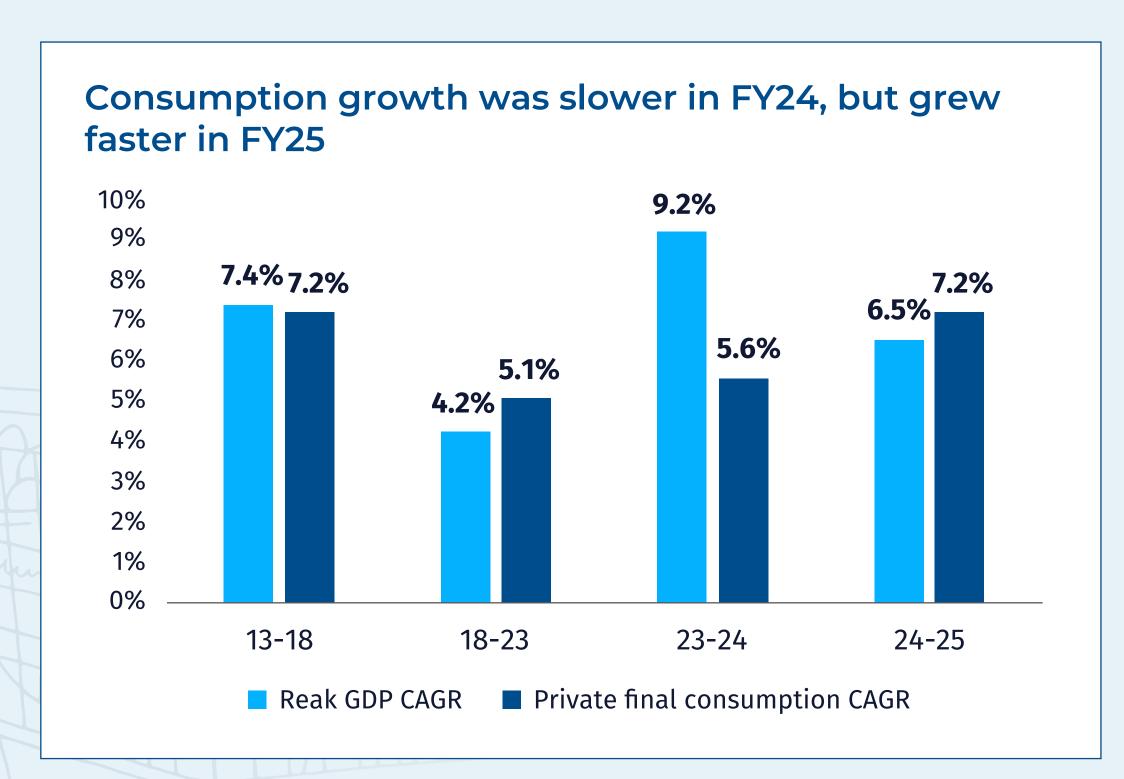

Source: Nuvama Institutional Equities

Past performance may or may not be sustained in future and is not a guarantee of any future returns.

## Consumption remains a major contributor to GDP

- Oomestic Private Consumption contributes 59% of India's GDP and has grown faster than Nominal GDP in the last 10 years
- Major constituents of Private consumption are Foods & Beverages, Clothing and Footwear, Housing and Fuels, Transportation, Healthcare, Communication, Education, Restaurants and Hotels etc

Source: CMIE; GDP = Consumption + Investment + Government Spending + (Export – Import)

## Private Final Consumption breakdown by category, India vs US

Private Final Consumption by categories, US\$ per capita		India			
		FY22	FY22 share of consumption	2022	
Food, Beverages and Tobacco	274	421	32%	3,797	
Clothing and Footwear	52	79	6%	1,460	
Housing, Water, Electricity, Gas and Other Fuels  Furnishing, Household Equipment and Routine Household Maintenance  Health  Transport  Recreation and Culture  Restaurants and Hotels		172	13%	10,370	
		39	3%	1,562	
		67	5%	8,101	
		212	16%	3,776	
		11	1%	3,747	
		18	1%	3,725	
Others	155	278	21%	13,477	
Total	825	1,296	100%	51,582	

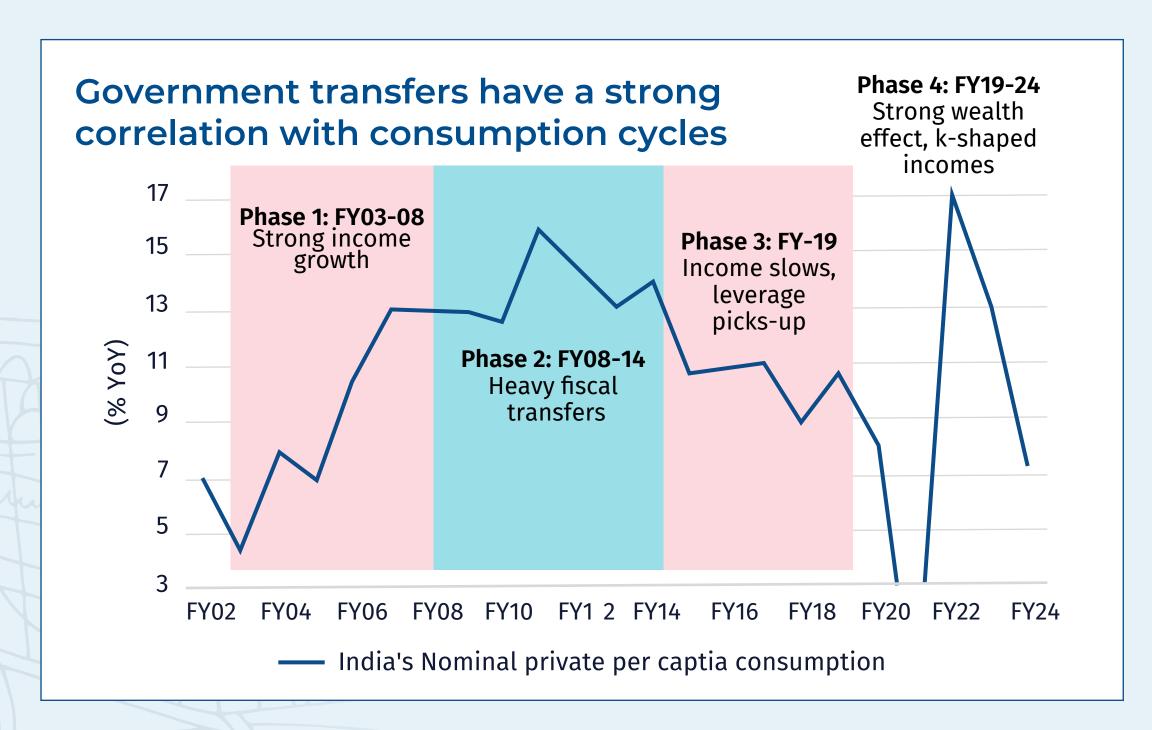

Source: MOSPI, US BEA, UN Population Database, Bloomberg. Currency rates used: (USD/INR) FY12 - 47.9; FY22 - 78.64

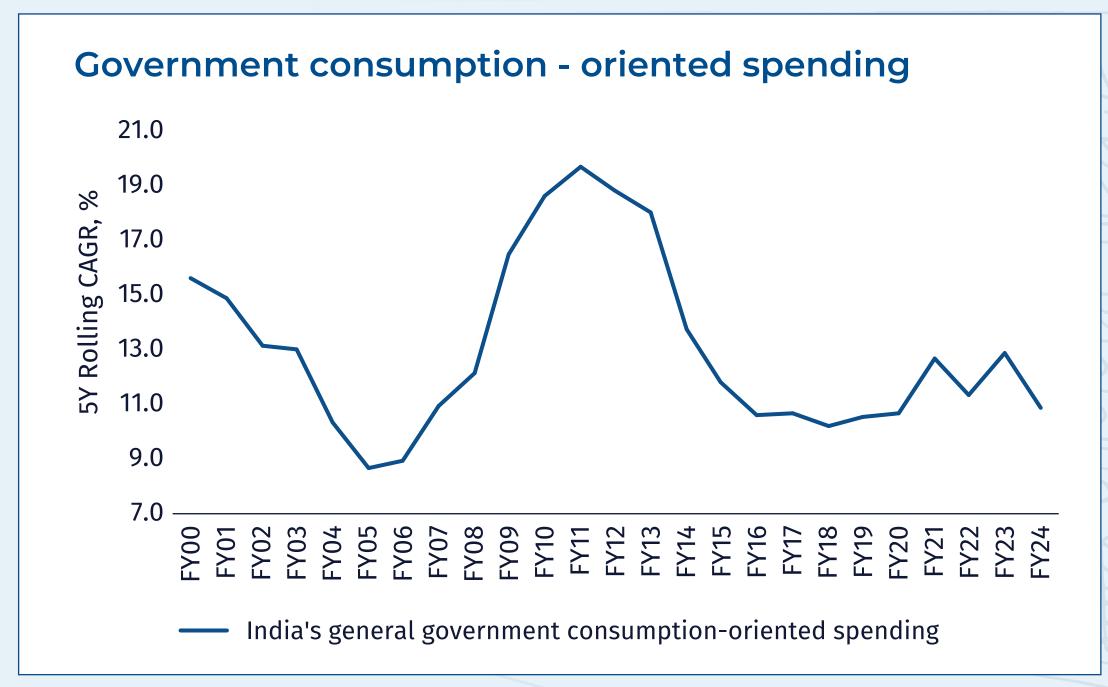

Past performance may or may not be sustained in future and is not a guarantee of any future returns.

## Government spending has high correlation to consumption cycles

- Historically, consumption growth in India has high correlation with welfare spending by government.
- High government fiscal transfers for welfare spending during FY08-14 (MGNREGA scheme, higher MSP growth etc.) led to a strong consumption cycle.
- India is seeing higher spending growth in FY26 budgets

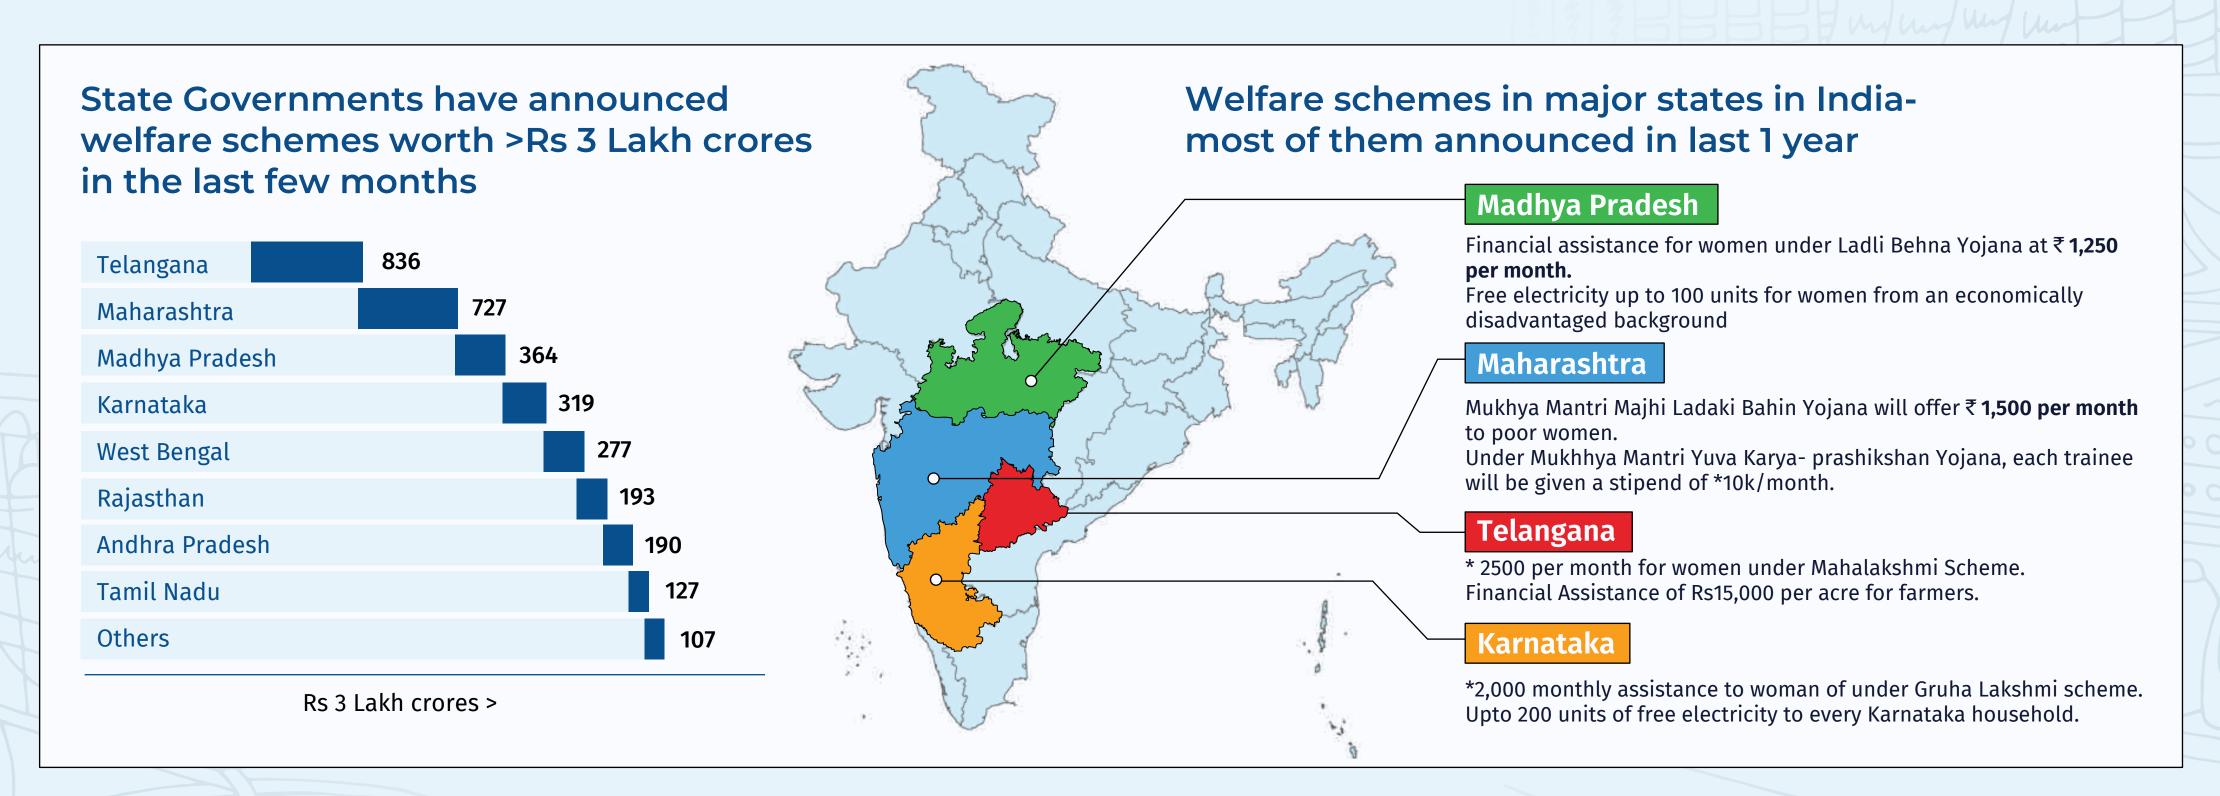

Source: Nuvama Institutional Equities

Past performance may or may not be sustained in future and is not a guarantee of any future returns.

## State governments led increase in welfare spending gaining momentum

- Large states including Maharashtra, Madhya Pradesh, Karnataka, Telangana, Andhra Pradesh etc have announced welfare schemes worth> Rs 3 lakh crores in the last few months
- Union Budget 2025 saw increase in revenue expenditure vs interim budget

Source: Avendus Spark

## Income Tax Cuts – more money in Consumer hands

- Reduction in slab rates and rebate upto Rs12 Lakh could mean that a significant portion of the population has <5% tax liability
- As per Budget, this move leads to Rs 1 Lakh crore of tax foregone
- Higher salaries have reflected starting April 2025 for most employees

Returned Income Range	Number of returns filed	Total returned income reported	Average returned income
		(In Rs crores)	(In Rs lakhs)
0	4,90,408	0	0.00
>0 and <=5 Lakh	5,23,85,897	20,41,642	3.90
>5 Lakh and <=10 L	1,32,55,362	9,21,549	6.95
>10 L and <=15 L	41,65,166	5,04,296	12.11
>15 L and <=25 L	28,81,670	5,45,197	18.92
>25 L and <=50 L	16,10,556	5,50,100	34.16
>50 L and <=1 Cr	4,55,589	3,12,451	68.58
>1 Cr	2,16,638	6,27,278	289.55
Total	7,54,61,286	55,02,514	

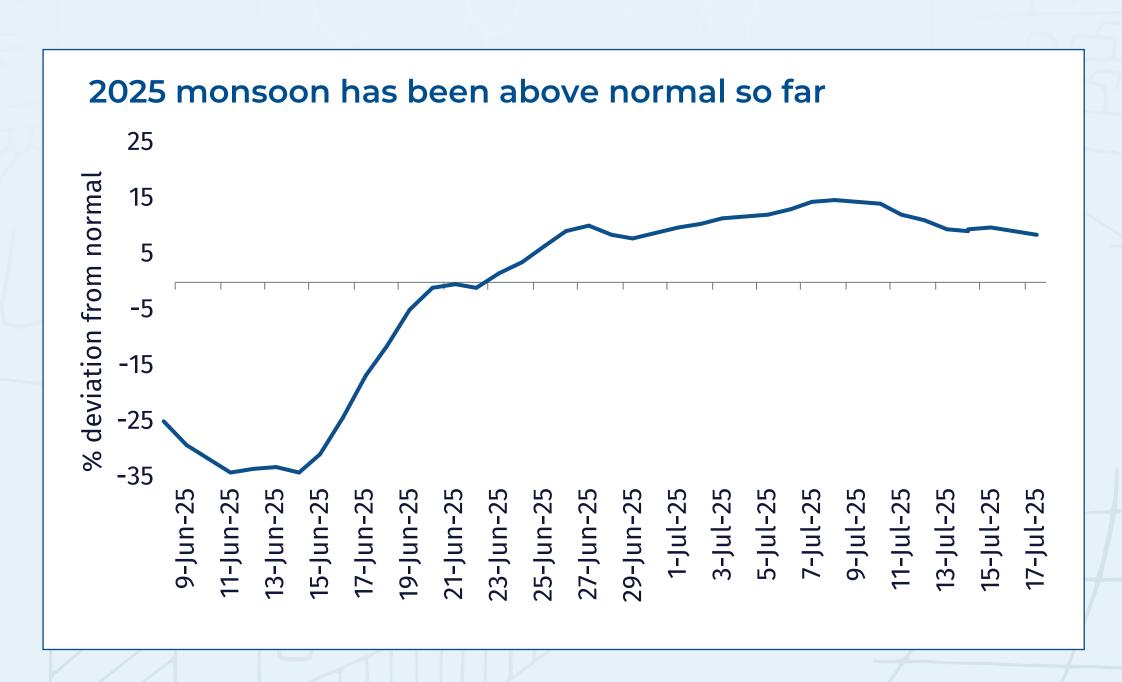

Income tax slabs	Income Tax Rates
Upto Rs. 4,00,000	NIL
Rs. 4,00,001 - Rs. 8,00,000	5%
Rs. 8,00,001 - Rs. 12,00,000	10%
Rs. 12,00,001 - Rs. 16,00,000	15%
Rs. 16,00,001 - Rs. 20,00,000	20%
Rs. 20,00,001 - Rs. 24,00,000	25%
Above Rs. 24,00,000	30%

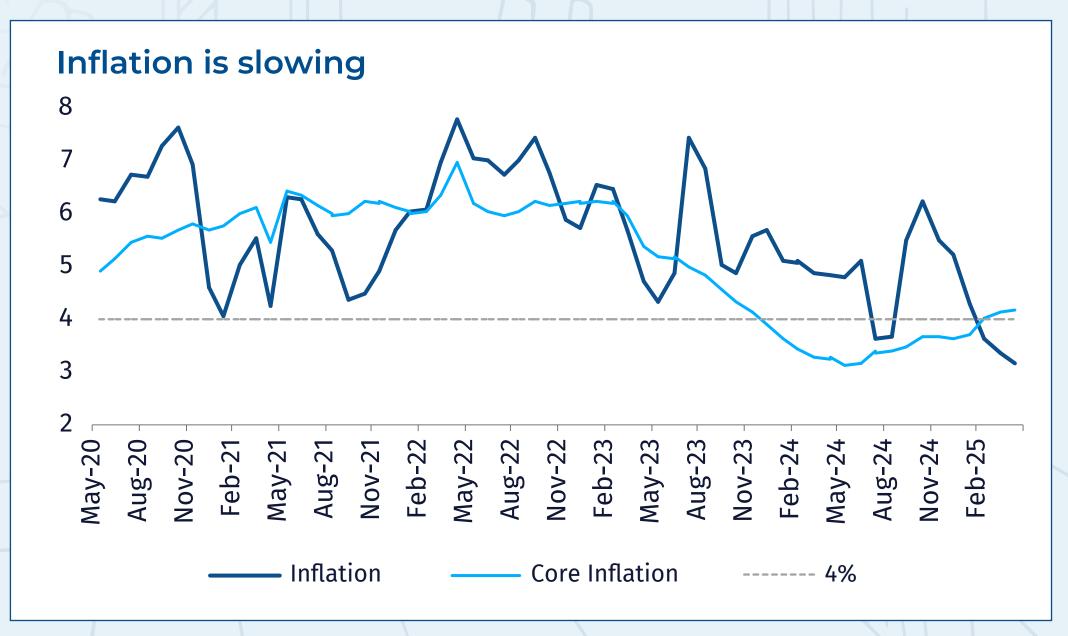

Source: Incometaxindia.gov.in, India Budget 2025

### Low inflation and good monsoon to uplift consumption outlook

- High inflation has historically led to lower consumption growth
- The rise in inflation post the pandemic has now slowed down, with CPI Inflation reporting 2.1% YoY for June 2025
- MD forecast for Monsoon 2025 is 'above normal', another potential boost to mass consumption

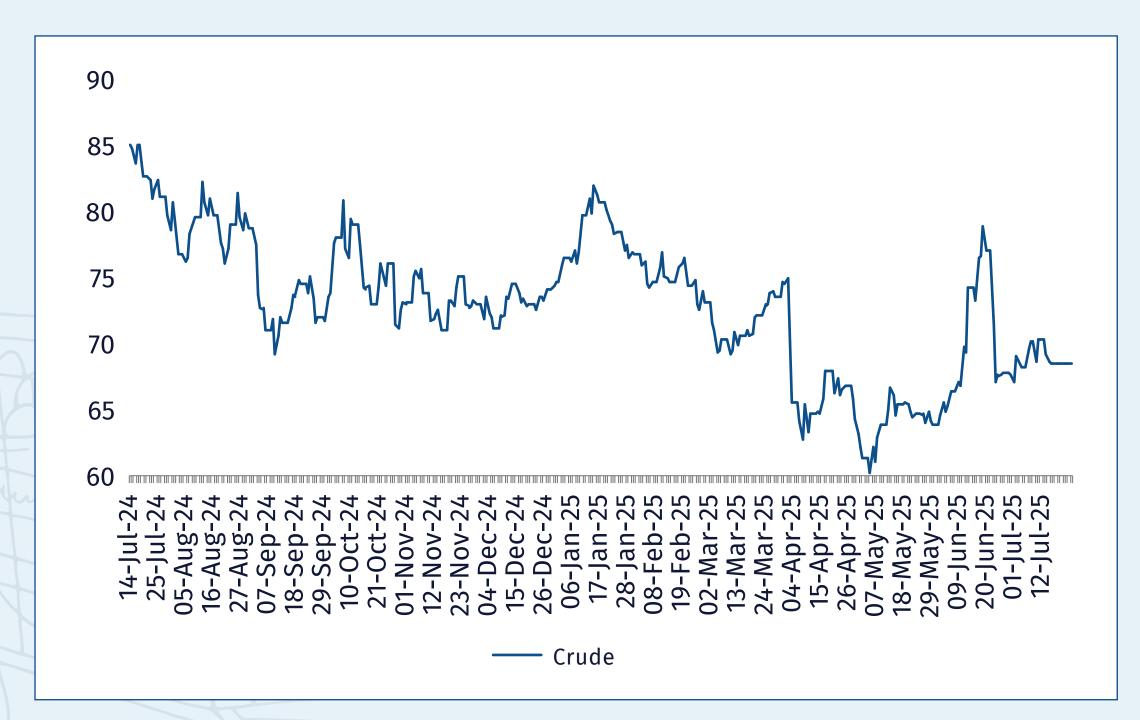

Source: CMIE

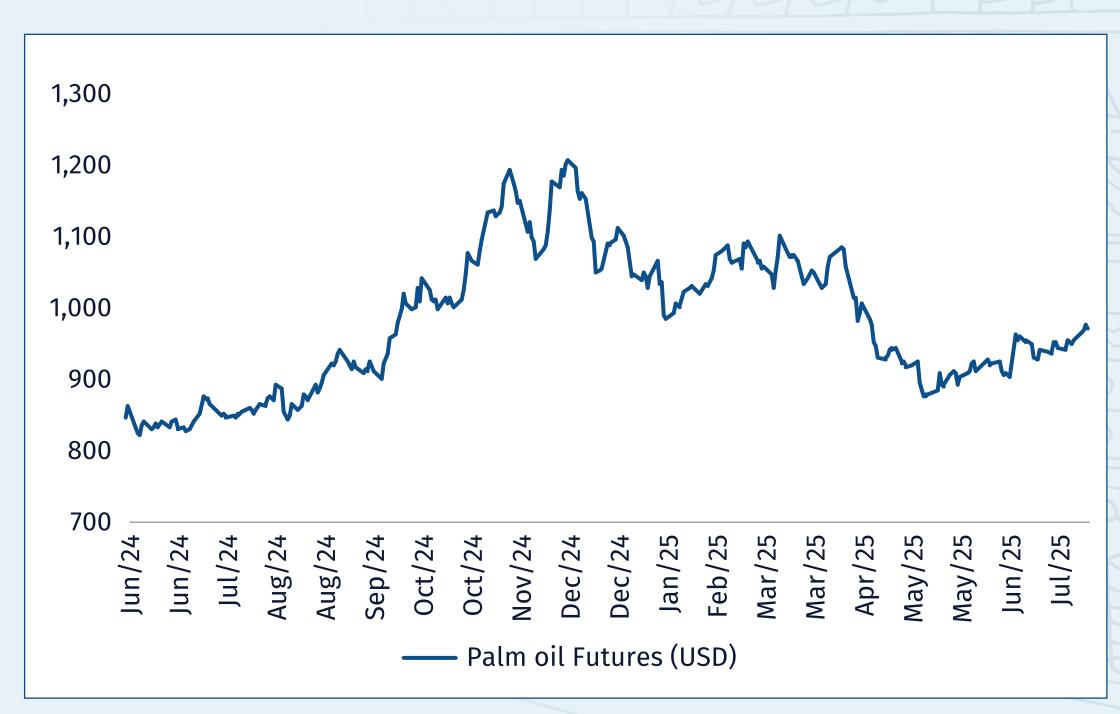

Past performance may or may not be sustained in future and is not a guarantee of any future returns.

### Crude and margins

- Crude oil prices have continued to stay low following OPEC's decision to increase oil supply. Weak demand outlook could contain crude oil price hikes
- Decrease in Palm oil costs on account of duty cut and falling international prices
- ✓ Indian consumer facing businesses are dependent on Crude and Palm Oil for input costs indirectly, and fall in prices tends to support margins

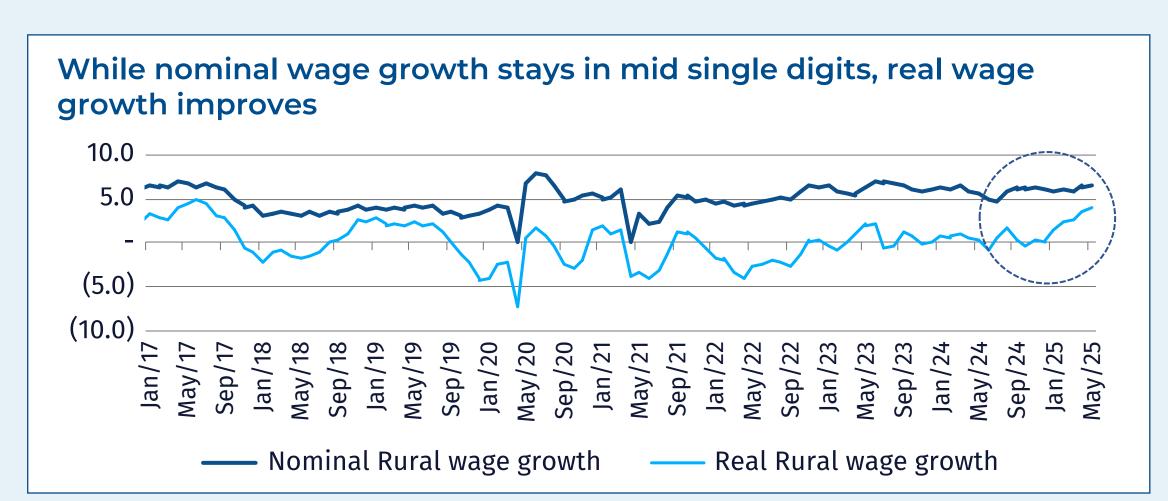

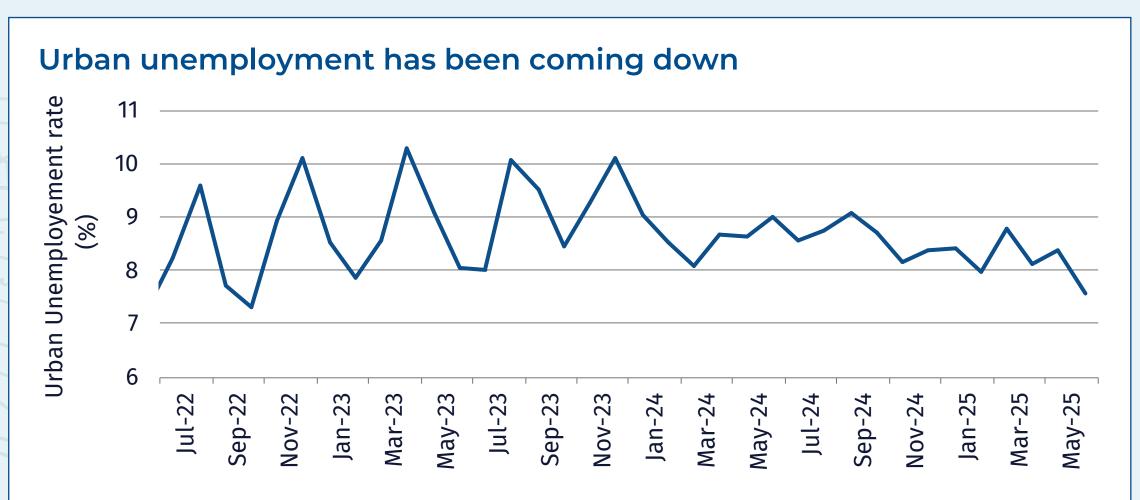

Source: Bloomberg

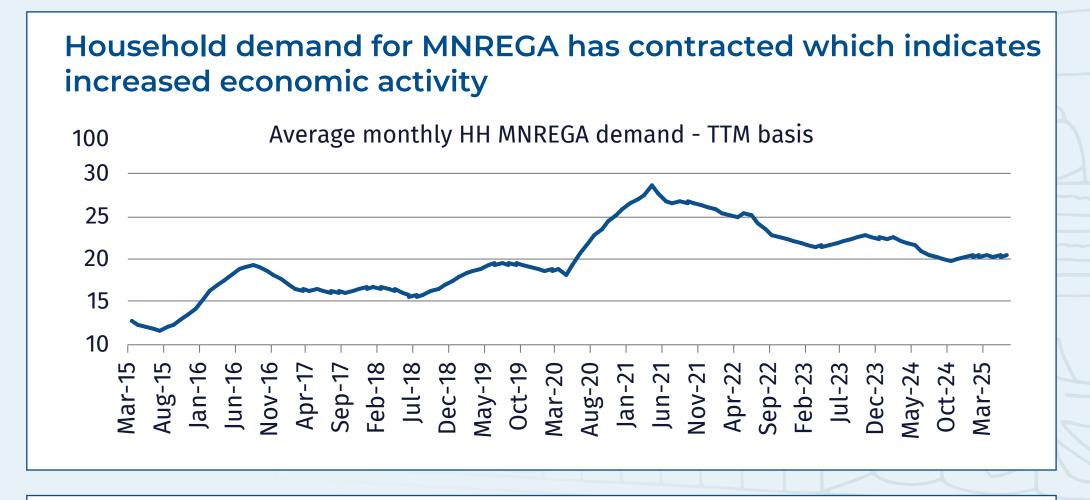

Past performance may or may not be sustained in future and is not a guarantee of any future returns.

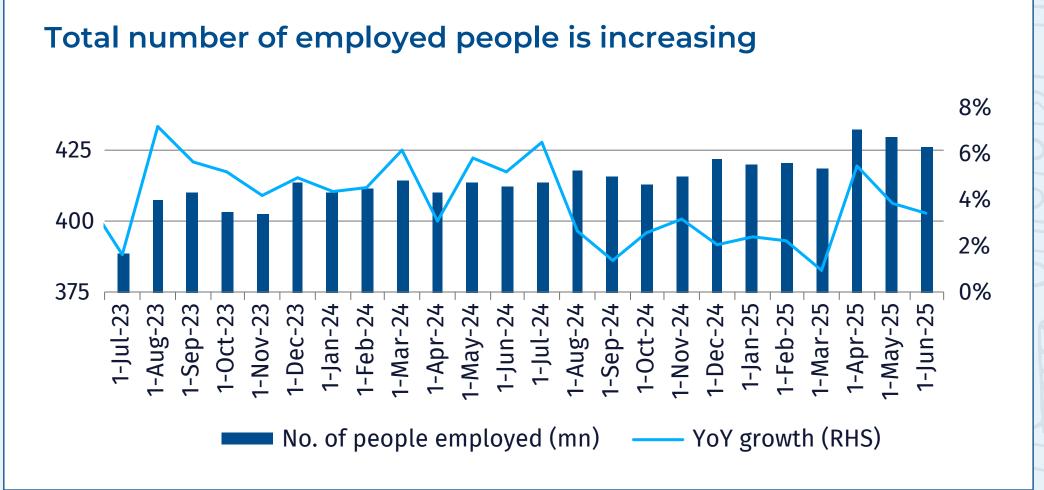

### Macro indicators bottoming out

Source: CMIE

Past performance may or may not be sustained in future and is not a guarantee of any future returns.

### Signs of revival in consumption

During-the quarter, Indian FMCG sector witnessed a sequential recovery in demand with uptick in volume growth particularly in urban markets...

...With the refreshed strategic vision and favourable macroeconomic conditions such as above average monsoon, good agricultural output, easing inflation and consumption-focused government measures, we expect revenue growth to regain momentum and trend higher in the coming quarters.

FMCG major, business update for Q1FY26 dated July 4, 2025

During the quarter, the sector exhibited consistent demand patterns, marked by improving trends in rural markets and steady urban sentiment. We expect gradual improvement in the quarters ahead, supported by easing inflation, a favourable monsoon season and policy stimulus. Amidst this backdrop, underlying volume growth in the India business continued to improve sequentially to reach a multi-quarter high, driven by positive trends in the core franchises and continuous scale up of new businesses.

FMCG major, business update for Q1FY26 dated July 3, 2025

Our Standalone business is likely to deliver high-single digit value growth on the back of mid-single digit UVG. Volume growth has been strongly competitive and is sequentially improving... As guided during our latest Investor Meet (May 2025), we expect performance to improve sequentially in FY26.

FMCG major, business update for Q1FY26 dated July 4, 2025

## What is Non-Cyclical Consumer theme

Demand for non-cyclical consumer goods and services remains relatively stable across different phases of the economic cycle. Sectors such as FMCG, Consumer Durables, Consumer Services, healthcare services are part of the theme

		Non-Cyclical	Cyclical
Fact Maying Concumor Coods (FMCC)	Packaged Foods	<b>✓</b>	
Fast Moving Consumer Goods (FMCG)	Home and Personal Care (HPC)		
	Consumer Durables		
	Consumer Services - Retail, Leisure, etc.		
Consumer Discretionary	Quick Service Restaurants (QSRs)		
	Media, Entertainment & Publications	<b>✓</b>	
	Automobile and Auto Components		<b>✓</b>
	Realty		<b>✓</b>
	Telecommunications	<b>✓</b>	
Others	Healthcare services	<b>✓</b>	
	Power		<b>✓</b>

Sectors such as Automobiles, Power and Realty are relatively more cyclical and hence are excluded

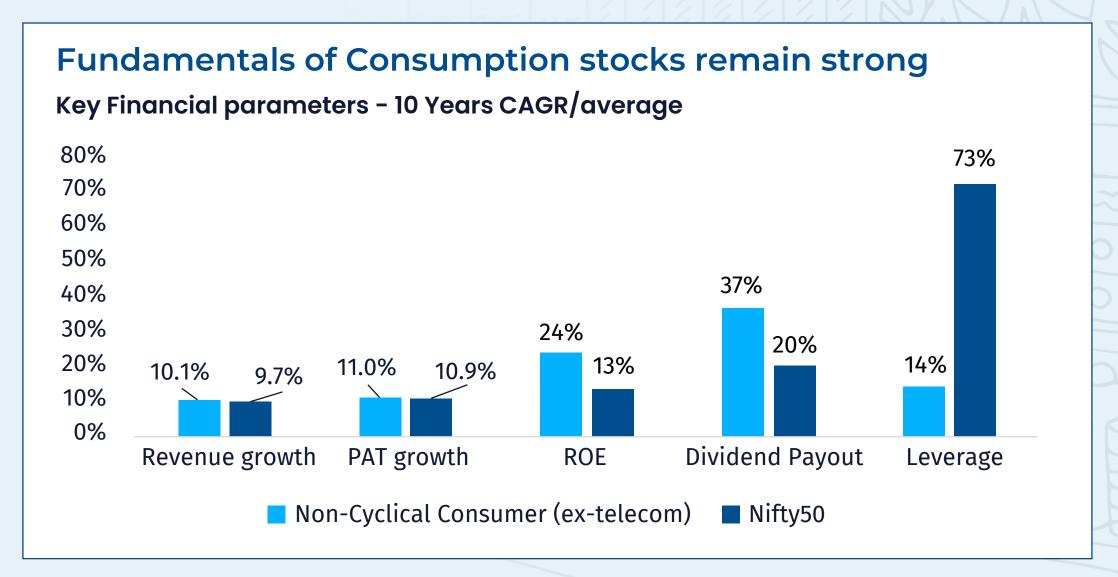

### Valuation - Trading in-line with last 5 years average PE multiple

- Consumption sector valuations are at 45x 1 yr Fwd P/E Ratio which is broadly in line with (2% above) last 5 years average
- Earnings growth surprise and higher visibility has led to valuation re-rating in the consumption stocks in the last 10 years. Also, during 2013-21, lower interest rate regime led to multiple expansion
- Reasons for higher valuation of the Consumption stocks compared to other sectors:
  - Higher margin and lower capital intensity leading to higher return on equity (ROE) and dividend payout
  - Higher visibility of earnings for longer period on account of brand loyalty and relatively lower technological disruption risks Strong balance sheet with lower leverage
  - Relatively low government's intervention
  - Lower risk from Global macro slowdown as majority of the companies are focused on domestic market

## Introducing

## HDFC Non-Cyclical Consumer Fund

### Investment strategy

Investment team at HDFC MF has a significant experience and understanding of the consumption sector We follow bottom-up stock selection approach for portfolio construction

**Core Portfolio** 

Core of the portfolio (at least 80%) will be invested in stocks that represent the non-cyclical consumer theme within the basic industries like Consumer Goods, Consumer Services, Telecom, Healthcare, Media, Entertainment and Publication.

**Multicap Strategy** 

Consumption space offers depth and diversity – the scheme would invest across segments and market capitalization

Focus on Leaders

Seek to invest in companies which are leaders and/or are gaining market shares due to superior execution, scale, better adoption of technology etc.

Secular growth/ Re-rating

Equally focussed on

- Companies which are likely to witness steady and secular growth
- Companies which are likely to see a turnaround in profitability and have potential of being re-rated

HDFC Mutual Fund/AMC is not guaranteeing returns on investments made in this scheme. The current investment strategy is subject to change depending on the market conditions

## Portfolio positioned to gain from changing consumption trends

Historical performance indications and financial market scenarios are not reliable indicators of current or future performance. HDFC Mutual Fund/AMC is not guaranteeing returns on investments made in the Scheme. The Fund may or may not have any present or future positions in the Stocks/Sectors.

## Risks and Mitigants

Risks	Mitigants
Growth in the aggregate consumption is dependent on the growth in India's economy	<ul> <li>India is currently witnessing high growth, and growth expectations from government and multilateral agencies are high</li> <li>Consumption of basic items don't move significantly basis small changes in incomes</li> <li>Companies have products across the price ladder in case of up-trading/down-trading</li> </ul>
Sharp inflation in raw material	<ul> <li>Relatively strong pricing power observed in leading companies to pass on price increases to the consumers</li> </ul>
Private labels (In-house brands of large retailers) gaining higher share	<ul> <li>Preference for branded products remains high in India which has led to lower growth of private labels in the past despite modern trade/ e-commerce gaining significance</li> </ul>
Competitive intensity going up and/or technological disruption	<ul> <li>Relatively strong moats such as distribution, brand equity, in-house R&amp;D which are difficult to penetrate</li> </ul>

Sectoral Funds carry higher risk, thus one should take controlled exposure to such funds

## Why invest in HDFC Non-Cyclical Consumer Fund

Consumption theme is likely to unfold in India with key fundamental drivers in place:

- Inflection point in per capita income as we cross the US\$2,500 mark
- Demographic Dividend and Higher Urbanization
- Premiumization across consumer categories
- Higher formalization, and
- Digitization

- Supporting near term factors such as
  - Improving macroeconomic factors (low inflation & lower input cost prices),
  - Increase in welfare spends led by state governments,
  - Above normal monsoons and
  - Recovery In consumption (both rural and urban)

Lower exposure to risks from Global macroeconomic slowdown and uncertainty

Stable earnings and ROE profile of Non-Cyclical Consumer companies

Relatively lower risk and volatility in earnings growth compared to other sectors

Fund is well positioned to aim to benefit from consumption growth, having invested across consumer segments and market capitalisation
