What is Quality investing?

- Quality refers to the level of excellence of goods & services compared to similar items
- Imagine you are going on a safari deep into the jungle. It is likely you will choose a well-reputed and high quality jeep and safety equipment, as these will be reliable during difficult situations you may encounter
- Just as how we use Quality products to give peace of mind, Quality investing can give us relative peace of mind during volatile times
- Quality investing selects resilient, stable businesses with strong balance sheets which could offer relative stability during market stress
- Quality strategy has generally performed well over the long term; the Nifty100 Quality 30 TRI has returned 13.3% CAGR compared to 12.5% CAGR for the Nifty 100 TRI*

*Data as of Jun 30, 2025. Past performance may or may not be sustained in future and is not a guarantee of any future returns. HDFC AMC/Mutual Fund is not guaranteeing or promising or forecasting any returns. For detailed performance, refer slide 12. Since FY20, the Quality factor performance has broadly lagged other factors

🕜 After this period of underperformance, green shoots are visible in Quality factor performance, as we have seen in FY24, FY25 and FY26 FYTD

Why does Quality often trade at a premium?

- Quality items cost more because they often deliver more utility to users than regular items
- For example, we are willing to pay more for a dinner at a popular restaurant than for street food. This is because the popular restaurant will likely offer better quality in terms of better ambience, food and service levels than a street vendor
- Likewise people are often willing to pay a premium for high quality smartphones, clothes, cars etc.
- Similarly, the features of quality companies efficiency, resilience and stability allow them to command a premium valuation, as other companies do not possess these features
- Return on Equity (RoE) measures efficiency and is a good proxy for a company's quality the RoE for the Nifty100 Quality 30 Index is 23.1% compared to 20.3% for the Nifty 100 Index*
- Thus, the higher RoE of Nifty100 Quality 30 Index is a factor contributing to this Index's higher P/E ratio of 29.58 vs. 22.82 for the Nifty 100 Index*
