

HDFC Arbitrage Fund: Fund Positioning

HDFC Arbitrage Fund seeks to generate income through arbitrage opportunities such as Index/Stock Spot vs Index/Stock Futures or Index Futures vs Stock Futures or Futures of same stock with different expiry months or ADR/GDR vs underlying shares etc. The Scheme invests a minimum 65% into fully hedged equity positions. The Scheme also uses corporate action or event driven strategies where there is a potential opportunity for arbitrage in cash or derivate market such as dividend arbitrage or buy-back arbitrage or merger etc. The scheme is an ideal investment vehicle during volatile or sustained bull markets as arbitrage opportunities offer superior returns due to market inefficiencies during such market cycles. The overall risk that the Scheme would carry would be that of being market neutral, i.e., no specific equity risk as the fund takes no directional bets. The ideal time horizon for investment is 6 months or more.

Investment Objective

To generate income through arbitrage opportunities and debt & money market instruments. There is no assurance that the investment objective of the Scheme will be achieved.
