

Aim To Hit The Right Notes With Equity, Debt and Gold Investments

Presenting

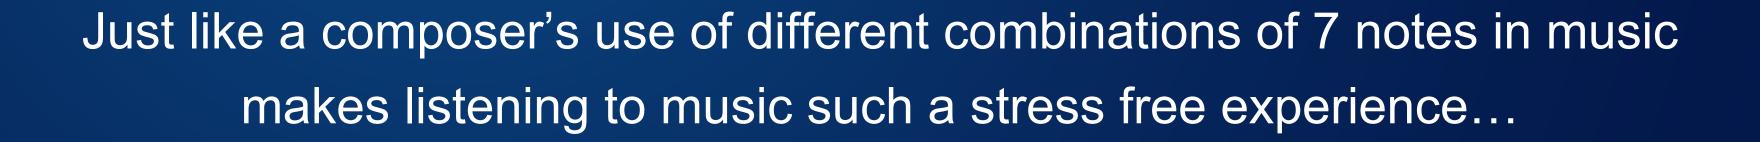

7 Notes, Multiple Emotions!

Multiple Asset Classes - One Fund

Equity

Aims to provide growth to an investor's portfolio

Debt

Aims to provide stability to an investor's portfolio

Gold

Aims to act as a hedge against inflation and currency depreciation

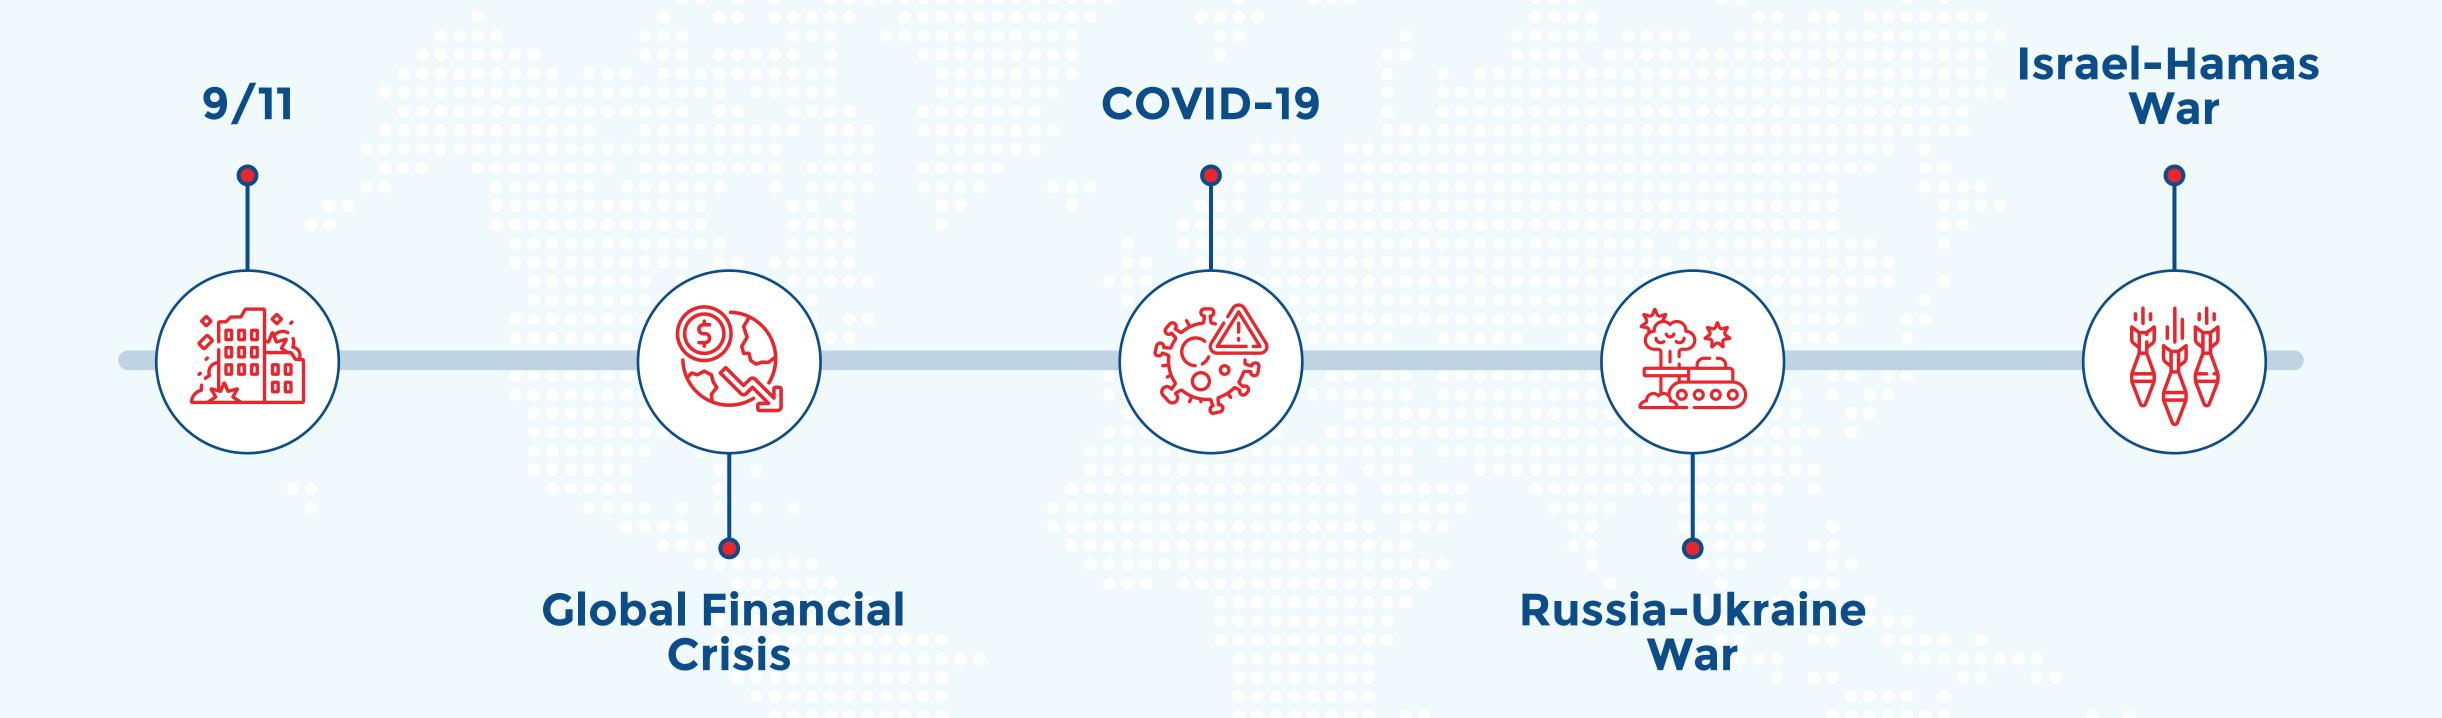

How does one take exposure to these asset classes efficiently?

Fund of Funds

allows investors to reduce their cognitive thinking of making investment decisions by relying on the expertise of Fund Managers to take exposure to multiple mutual fund schemes / asset classes

Short Term and Emotions – A Close-knit Relationship

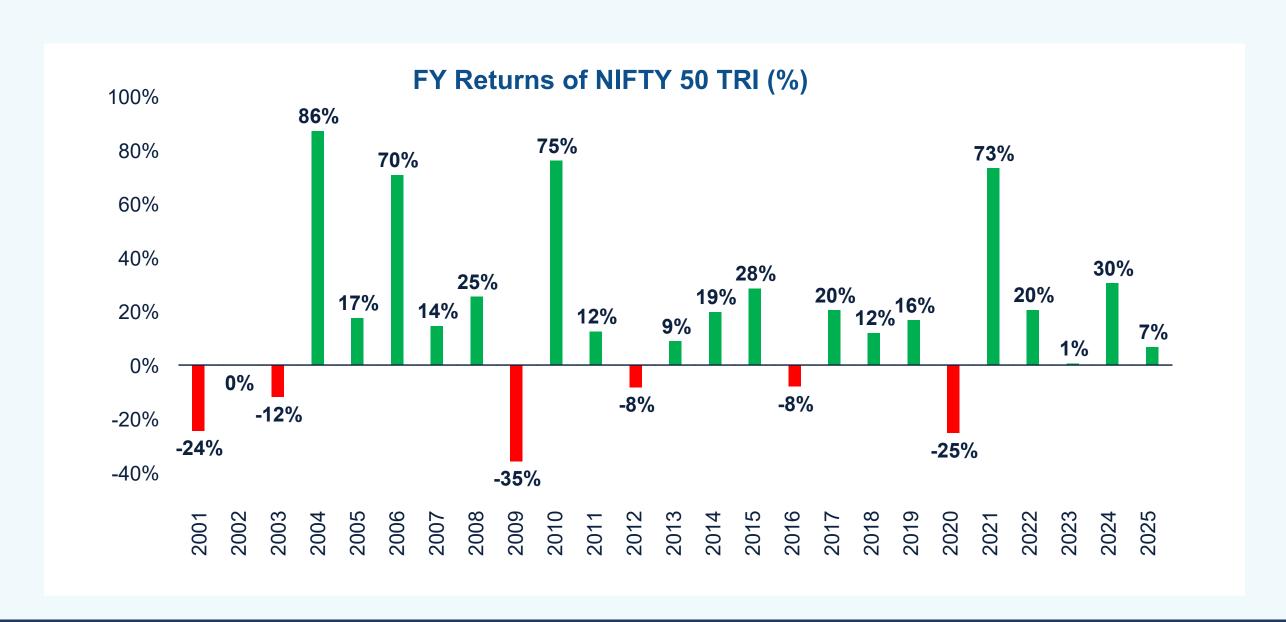

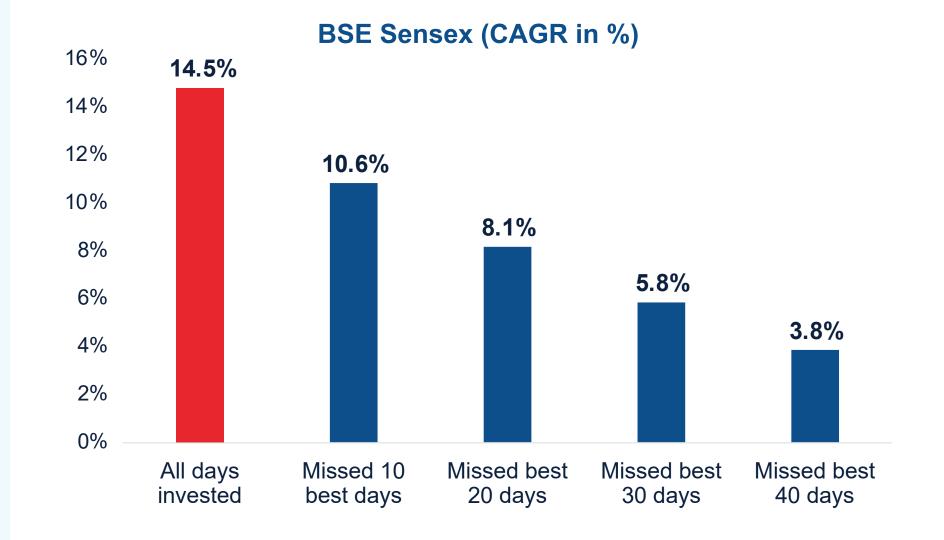

Last 20 years → Witness to multiple key events that have impacted equity markets in the short term

Is timing the Equity Markets easy?

Difficult to predict the correct entry and exit points consistently in the short term

Spending time in the markets → Key to wealth creation!

How does one *manage downside risk?*Combining negatively correlated assets

Source: www.bseindia.com, www.niftyindices.com, BSE Sensex data from April 2002 to April 2025. Past performance may or may not be sustained in the future and is not a guarantee of any future returns.

Negative Correlation brings "Diversification"

| From April 2002 to April 2025 | Equity | Debt | Gold |
|----------------------------------|--------|-------|-------|
| Equity | 1 | -0.19 | -0.10 |
| Debt | -0.19 | 1 | 0.02 |
| Gold | -0.10 | -0.02 | 1 |

Combining assets with low correlation* → Ability to reduce risk and offer opportunity of generating optimal returns

*Correlation is a measure of how asset classes move in relation to one another over a period of time

Comparison with Gold has been given solely for the purpose of understanding and illustrative purposes.

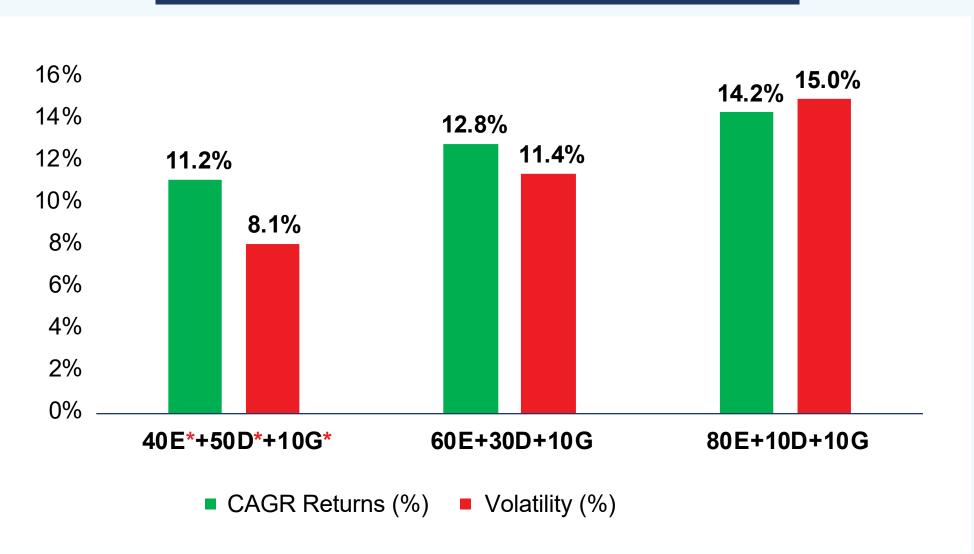

Concentrate versus Allocate?

Individual Asset Classes

Asset Allocation reducing volatility!

Equity → Potential to generate higher returns versus other asset classes, but volatility much higher

Combining multiple asset classes improves the risk-adjusted returns for an investor

Source: www.niftyindices.com, World Gold Council. Data from March 31, 2002 to April 30, 2025. Returns are compounded annual in nature. Data used for asset classes: Equity – NIFTY 50, Debt – NIFTY 10-year Benchmark GSec, Gold – Spot Rate ₹/10 Grams. Monthly portfolio rebalancing assumed. Standard Deviation calculated using daily returns. The above analysis is based on back-testing of the above mentioned asset classes. HDFC Mutual Fund/AMC is not guaranteeing future returns of these asset classes. Comparison with Gold has been given solely for the purpose of understanding and illustrative purpose. The above combinations are for illustrative purpose. Investors are requested to take professional advice while making investment decisions. *E: Equity, D: Debt, G: Gold

- ➤ Gold prices and real interest rates indicated by Treasury Inflation Protected Securities (TIPS) → Negative correlation witnessed historically
- Indian Gold Prices → Returns in Indian ₹ factor in currency movement vs US\$, taxes and duties levied by Government

Current Positioning:

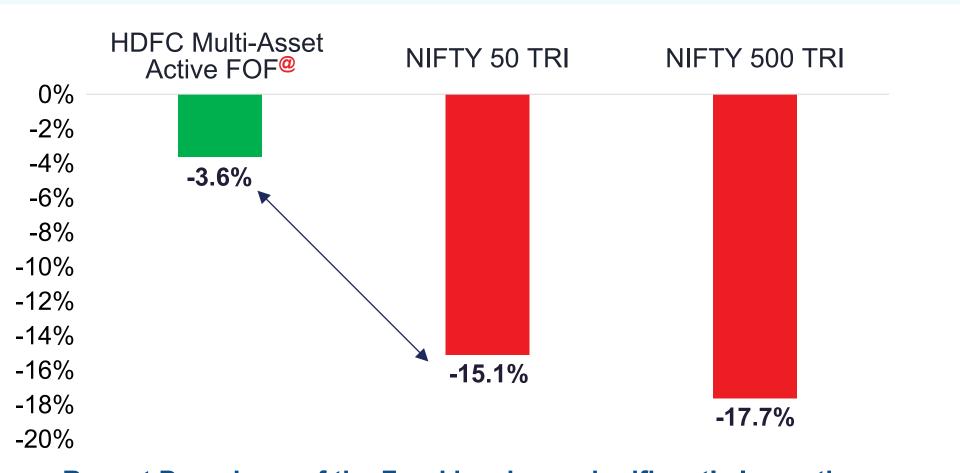

Allocation to Gold has been tactically reduced on account of the sharp rally witnessed in Gold prices (**Rationale**: Geopolitical risks and uncertainty created by the imposition of tariffs by US Government on different countries could have been a primary factor behind the rally in Gold prices in the recent past)
