Artificial Intelligence

Headwind or Tailwind for
Indian IT?

H-1B Visa Restrictions

Impact on Operating Model?

Current Slowdown

Structural or Cyclical?

India Internet Services

Is there still room for further
penetration?

Artificial Intelligence – Headwind or Tailwind for Indian IT?

Indian IT has evolved stronger and larger over the past 3 decades by successfully adapting to technological changes

H-1B Visa Restrictions – Impact on Operating Model?

Indian Workforce highly skilled

One of the top in terms of AI skills penetration

2nd largest in terms of *AI/ML BDA talent pool, globally

3rd globally, in terms of installed supply of Cloud professionals.

Country-wise Tech Talent Distribution (%)

Note: Data excludes China

Yearly STEM Graduates (in lakh)

Note: STEM is an abbreviation for Science, Technology, Engineering and Mathematics.

Since 2017, Indian IT companies have increased local hiring in the US, including campus hiring. Today, 60%+ of US employees are locals vs 1/3rd in 2016!

Way Forward

- a) Hiring more local talent in the US
- b) Nearshoring or offshoring to India or other destinations
- c) Pass on the new fee (partly or fully) to clients

Average New Applications approved for Indian IT Companies have fallen since 2016

For disclaimer refer slide 21

Current Slowdown – Structural or Cyclical?

IT Sector witnessed high growth in exports between FY21 and FY23 due to higher technology spends during the pandemic

Since FY24: Growth in exports has remained subdued due to normalization of spends and concerns about potential slowdown of global economy

Indian IT Business Process Management (BPM) Exports has seen multiple upcycles and downcycles

Digitalization in India – Long Runway for Growth (1/2)

India's Internet Penetration has a long way to go

A large section of people with access to internet are still untapped by online businesses

E-commerce is now >20% of Total Retail Sales in US and China

E-commerce Penetration in Total Retail Sales

Digitalization in India – Long Runway for Growth (2/2)

Size of the Indian E-commerce Market is increasing

Share of Digital Insurance Premia expected to rise

Digital Premium as % of Total Industry Premiums

Food Delivery Business has been growing steadily

Food Delivery Business GMV (₹ billion)

Quick Commerce still has ample room for growth

Risks	Mitigants
Dependence on global economic growth / macro variables	➤ Value proposition of tech is evolving from costs / efficiency to revenue generation, making tech spends more sticky across economic cycles ➤ Sharp currency moves impact near-term profitability. In the long term, this is usually passed on to customers
High Employee turnover / war for talent	➤ The scale of talent supply in India balances out the issue of employee turnover over the medium term
Competitive intensity and / or technological disruption	➤ Relatively strong moats such as long customer relationships, investments in (re)skilling talent should aid competitiveness and adaptability to technological evolutions
Government regulations	➤ Restrictions in global mobility (immigrant visas) and/or increase in immigrant wages could impact near term fundamentals. In the medium term, such restrictions or increase in costs lead to higher offshoring
Concentration risk: The upper ceiling on investments made is in accordance with their weightage in the BSE TECh or 10% of the NAV of the scheme, whichever is higher	➤ Fund will try to achieve diversification through various strategies such as multi-cap strategy

Balakumar B

Fund Manager and Senior Equity Analyst

- Balakumar has over 14 years of experience in equity research, consulting, application development
- He joined HDFC Asset Management Company Ltd in September 2021. Prior to that, has worked with Sanford C. Bernstein (India) Private Ltd as an Assistant Vice President
