

Fund Positioning

HDFC Short Term Debt Fund focuses on generating regular income by investing in debt & money market instruments while maintaining a Macaulay Duration 1 to 3 years. The focus is on returns through interest accruals by building a relatively higher quality credit portfolio with a shorter maturity profile. The scheme is ideal for an investment horizon of more than 12 months.

Investment Objective

To generate income/capital appreciation through investments in Debt and Money Market Instruments. There is no assurance that the investment objective of the Scheme will be achieved.

Portfolio Details (as on October 31, 2025)

Residual Maturity*	3.44 Years
Macaulay Duration*	2.43 Years
Annualized Portfolio YTM #*	6.98 %

semi annual YTM has been annualised.

* Calculated on amount invested in debt securities (including accrued interest), deployment of funds in TREPS and Reverse Repo and net receivable/ payable.

#Macaulay Duration (Duration) measures the price volatility of fixed income securities. It is often used in the comparison of interest rate risk between securities with different coupons and different maturities. It is defined as the weighted average time to cash flows of a bond where the weights are nothing but the present value of the cash flows themselves. It is expressed in years/days. The duration of a fixed income security is always shorter than its term to maturity, except in the case of zero coupon securities where they are the same.

Portfolio Classification by Asset Class (%) as on October 31, 2025
