Sectoral Allocation : Outcome of our investment philosophy

- Primarily a function of stock selection
- Benchmark aware with respect to sectoral weights, with tolerance for higher deviation

Overweights

- **Consumer Discretionary:** Long-term theme linked to pick up in consumer spending power
- **Financials:** Credit Growth, benign credit cycle, greater financialization of savings

Underweights

- **Energy:** Stock selection driven underweight
- **Consumer Staples:** Growth and margin risk, excessive valuation
- **Industrials:** Stock-specific, valuation driven underweight

Flexible approach to market cap allocation

- The Scheme can invest across market cap segments, without a market cap bias
- Market cap allocation is determined by relative attractiveness of opportunities in each Market Cap segment

- At present, the scheme has a large cap bias owing to relatively better valuation multiples for Large Caps vis-à-vis Mid and Small Caps

Scheme's equity exposure rebased to 100%
