Investment Objective

To achieve capital appreciation/income in the long term by primarily investing in undervalued stocks.. There is no assurance that the investment objective of the Scheme will be achieved.

HDFC Value Fund: Investment Strategy

HDFC Value Fund is a value fund that invests in value stocks (undervalued stocks trading below their intrinsic value) with a strong track record, cash flow, and management.

- No Sector bias: Well diversified across sectors, with a bias towards attractive companies in each sector
- Value Bias : The Scheme endeavors to maintain a minimum of 60 % of the portfolio in companies which are trading at multiples lower than Median P/E (Price/Earnings) or Median P/B (Price/Book Value) of NIFTY 500 Index or below 5 year historical average of own trailing P/E or P/B
- No Market cap bias: Being a multi-cap fund benchmarked to the NIFTY 500 there is an attempt to have good representation across market capitalizations based on opportunity and risk-reward
- 4 guiding principles for portfolio creation:
 - (1) Focus on buying value stocks
 - (2) Bottom-up stock picking within sector
 - (3) Sectoral diversification
 - (4) Ensuring consistency of risk adjusted returns
- Effective diversification across a wide area of sectors to manage risk
