

# HDFC Arbitrage Fund

(An open ended scheme investing in arbitrage opportunities)

HDFC Arbitrage Fund endeavors to generate income through arbitrage opportunities arising out of pricing mismatch in a security between different markets or as a result of special situations.

The Fund at all point of time maintains completely hedged positions, neutralizes market risk and targets absolute returns irrespective of market conditions.

This Fund is an ideal investment with respect to Balance of safety, returns and liquidity.

Investors should seek professional advice while investing. Returns are not assured.

## HDFC Arbitrage Fund – Case for Investing

- The Fund maintains a completely hedged position with no naked exposure to equities and managed a market neutral portfolio
- The Fund follows a conservative approach in stock selection, i.e Large Caps v/s Mid & Small Cap stocks. The stock selection is based on liquidity, spreads and rollover volumes
- Active management by experienced Fund Management Team to capitalize on the best of arbitrage opportunities

This is current investment strategy which may change from time to time. Investors must refer to Scheme Information Document for Asset Allocation pattern and investment strategies in various scenarios.

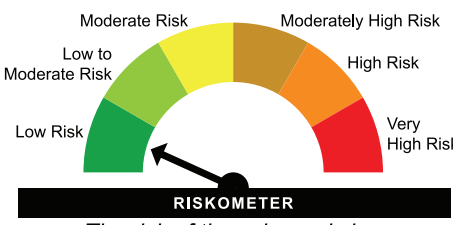

As on June 30, 2026

## Conclusion

The returns in the Arbitrage Funds tend to move in line with money market rates.

We believe that Arbitrage Funds may offer better returns when compared with returns in fixed income products, due to the equity taxation advantage available in the category.

In view of individual nature of the tax consequences, each investor is advised to consult his/her own professional tax advisor. The AMC / Mutual Fund is not guaranteeing or promising or forecasting any returns
