The risks associated with index futures are similar to those associated with equity investments. Additional risks could be on account of illiquidity and/or mispricing of the future at any time during the life of the contract.</p> <p>Using Index Futures to increase percentage investment in equities</p> <p>This strategy will be used for the purpose of generating returns on idle cash, pending its investment in equities. The Scheme is subject to daily flows. There may be a time lag between the inflow of funds and their deployment in stocks. If so desired, the scheme would be able to take immediate exposure to equities via index futures. The position in index futures may be reversed in a phased manner, as the funds are deployed in the equity markets.</p> <p>Example: The scheme has a corpus of Rs. 50 crore and there is an inflow of Rs. 5 crores in a day. The AMC may buy index futures contracts of a value of Rs. 5 crores.
